Council of Ministers of December 21, 2018

Strategic transformation support Heyaru Engineering nv in Houthalen-Helchteren

21 December 2018, proposed by [Minister Philippe Muyters](#)

The Flemish Government grants 2 million euros in strategic transformation aid to Heyaru Engineering nv in Houthalen-Helchteren. To meet the current and future demand for synthetic diamonds, Heyaru wants to open its first European location in Lommel. This production facility will become the central hub for the group for both the production of synthetic diamonds and for research into new techniques and applications in Europe.
